

FT GUIDE

WHY INDIA COULD BE THE AI FACTORY OF THE WORLD

India is helping to power the AI boom – but will it shape the future, or just serve it? The latest *FT Tech* video investigates whether data annotation to train AI models and humanoid robots is enough for India to thrive in the AI era.

FT Tech is our video series on emerging technologies, focusing on enterprise AI and new AI applications.

Watch *The AI Factory: The Rewiring of India's Tech Industry* now at ft.com/real-economy-ai-explainer
